Who we are?

Syra Health is a Nasdaq-listed healthcare technology company (SYRA) with a mission to power better health through affordable, accessible, and prevention-focused products and services that address some of the most critical challenges in healthcare. With a focus on Behavioral and Mental Health, Population Health, and the Healthcare Workforce, Syra Health is advancing the healthcare industry through innovative services and leading-edge, AI-backed, technology products.

Our Vision

Syra means perfection and we strive for perfection as we work to achieve our vision of becoming a leading healthcare solutions provider.

At Syra Health, we evaluate the true needs of our customers and deliver strategic solutions that are able to be seamlessly integrated.

What we offer?

Payers

We offer an extensive set of solutions aimed at improving health outcomes for members and payer organizations.

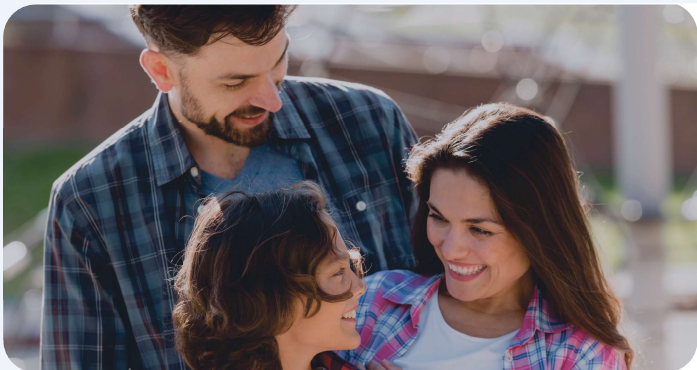

Providers

We deliver industry-leading solutions to improve care and equity across all populations.

Academic Institutions

We provide products and services that improve the mental health of students, staff, and faculty at academic institutions across the country.

Life Sciences

We work hand-in-hand with our customers to ensure our solutions align with business objectives, regulatory requirements, and therapeutic advancements.

Our Solutions

Behavioral & Mental Health

Enhancing behavioral and mental health for improved mental well-being.

Healthcare Workforce

Alleviating healthcare workforce burnout and shortages through comprehensive workforce solutions.

Population Health Management

We provide end-to-end strategies and solutions to improve quality of care, access to care health outcomes, and healthcare policies.

Behavioral & Mental Health

Our aim is to provide our customers with the greatest quality Behavioral and Mental Health care, by offering a wide range of products and services targeted at achieving the best healthcare outcomes.

Comprehensive Approach

At Syra Health we profoundly believe that mental health should be valued as highly as physical health. That is why we offer a variety of prevention-focused, AI-backed, technology-enabled products and innovative services designed to prevent the next mental health crisis.

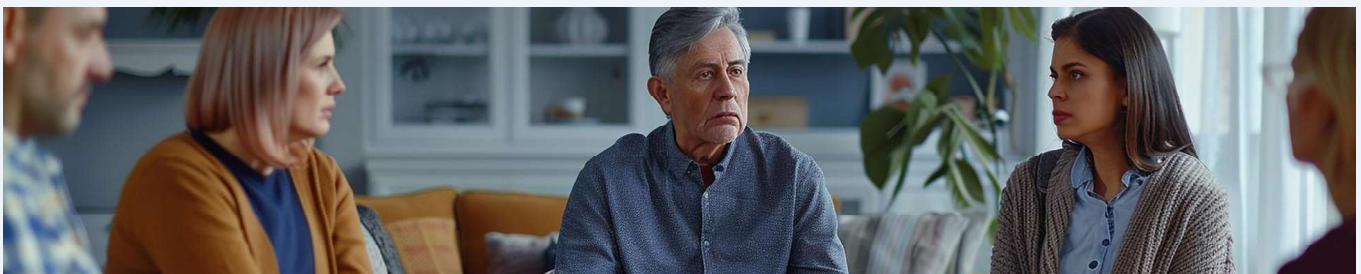

Technology Enabled -Care

Syra Health leverages AI to enhance the delivery of our mental and behavioral health services. Through our innovative digital health platforms, individuals can access assessments, cognitive therapy interventions and connect with healthcare professionals via telehealth, enabling convenient and accessible care from the comfort of their own homes.

Evidence-Based Support

Our expert psychological team provides evaluations, assessments, and support for enhanced mental wellness.

A Mental and Behavioral Health app

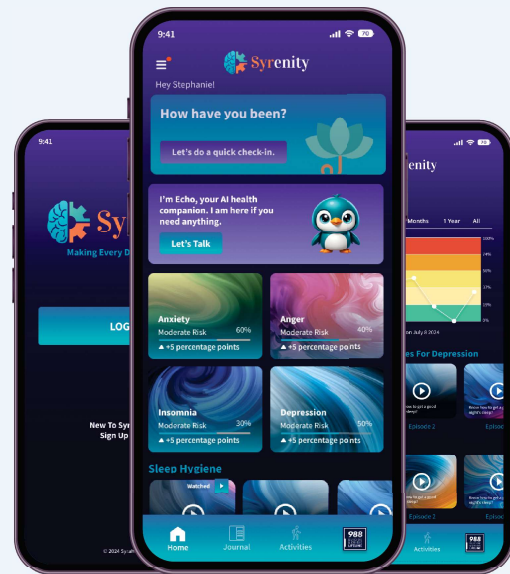

Introducing Syrenity The Comprehensive Mental Health Solution

Syrenity combines science and artificial intelligence to help individuals manage common mental health challenges such as stress, anxiety, and depression, while also helping organizations support their employees, students, and members in managing these challenges.

- Scientifically based with a dual focus on prevention and intervention.
- Empowers individuals to take control of their mental health anytime, anywhere.

What Sets Syrenity Apart

- Evidence-Based: Backed by research and guided by licensed mental health professionals.
- User-Friendly Interface: Intuitive design and seamless user experience for enhanced engagement and satisfaction.
- Privacy and Security: Robust data protection ensures confidentiality and compliance with regulations.
- Prevention-First Approach: Helps identify mental health conditions before they escalate.
- Comprehensive Solution: Syrenity offers a complete suite of features for holistic mental health management.

Key Features of Syrenity

AI-Integration

AI-backed conversational companion mirrors human empathy and support as it encourages users to reflect and engage.

Symptom Monitoring

Sophisticated algorithms provide symptom severity scores for progress tracking.

Personalized Assessments

Tailored assessments to understand individual needs and tailor interventions.

Evidence Based Interventions

Cognitive behavioral therapy techniques, education, and more.

Educational Resources

Extensive library of articles, videos, and interactive modules for self-guided learning.

Telehealth

Convenient virtual consultations with licensed mental health professionals.

Available as a business-to-business solution or:

Population Health

We define Population Health as the process of assessing and analyzing healthcare and its delivery to create improvement for a population of individuals. We provide end-to-end solutions and strategies to enhance quality of care, access to care, health outcomes, and healthcare policies.

Analytics as a Service

We leverage advanced analytics tools and techniques to analyze large volumes of population health data. Doing so helps healthcare organizations make informed decisions and improve outcomes at a population level.

Epidemiology

Our team of experts provide cutting-edge data analysis and research on health and healthcare to tailor valuable insights for our customers. Through collaboration, data expertise, and our advanced epidemiological capabilities, we are improving the results of our customers.

Health Equity Analytic Solutions

Our solutions target disparities from regional to organizational levels and provide interventions that promote equitable health and healthcare for all.

Education and Training

Our services focus on equipping individuals and organizations with the knowledge and skills necessary to improve health outcomes across communities. These services include programs that address key topics such as disease prevention, health promotion, and health disparities.

SyraBot
